

## HESSLE FORESHORE

### Purpose of the project

Essential works to reinforce, strengthen and stabilise embankment supporting the railway track running along the Riverside Walkway parallel to the Humber, preventing further movement and potential damage.

### Duration of works

Works are anticipated to be completed in January 2021, including installation of a 138m long, 20m deep pile wall. This will require temporarily closing a section of the Yorkshire Wolds Way National Trail (see photo for footpath closure points), in order to protect the safety of the local public and environment while works are underway. As it is not possible to provide a safe diversion during the scope of the works, pedestrians are encouraged use public transport to bypass this part of the Yorkshire Wolds Way, or return at a later date to when works are complete.

### End benefit

Stabilisation of the railway embankment carrying the Hull to Selby line from erosion due to the Humber.

### Information Event

Network Rail invites you to find out more about this work on Monday 17th February 2020, 3:30pm - 6pm. the Priory Room, North Ferriby Village Hall, 50 Church Road, North Ferriby, HU14 3AA.

### Hessle Foreshore footpath temporary closure and working area

### Project Duration Timeline

PROJECT MILESTONES	Works begin	Site establishment	Installation of steel piled wall	Installation of pile cap	Installation of handrail, site tidy, site demobilisation	Works end
MONTHS	MARCH 2020	MARCH - APRIL	APRIL - OCTOBER	OCTOBER - DECEMBER	DECEMBER - JANUARY 2021	JANUARY 2021
