

Essential gas mains upgrade on Melton Road, North Ferriby

The north of England's gas distributor, Northern Gas Networks (NGN), is investing £560,000 in North Ferriby to upgrade the ageing gas distribution network.

The work on Melton Road, is part of NGN's ongoing development of infrastructure in North Ferriby which started in March this year and involves replacing over 7300 metres of existing metal gas mains with more durable plastic pipes. This is to ensure the continued safe and reliable supply of gas to our customers for years to come.

In order to complete the next part of the work safely and efficiently, it is necessary to put a temporary road closure in place on Melton Road between Narrow Lane and Parklands Drive.

This closure will be in place from 11 November 2019 for two weeks. A full sign posted diversion route will be set up and residents will have access to their properties within this area.

All work has been planned in conjunction with Hull City Council.

David Johnson, Site Manager for NGN, said: "We would like to thank all our customers in North Ferriby for their patience and understanding while we have been carrying out this essential work. We are very sorry for the inconvenience the work is causing and we're doing every we can to complete the project as soon as possible".

For further information about the project please contact NGN's Customer Care Team on **0800 040 7766** or email: customercare@northerngas.co.uk.

Notes to editors

1. Since we started operating in 2005, we've been leading the way as one of the most cost-efficient of the UK's eight gas distribution networks. We deliver great value for money to our customers, as well as a whole host of social and economic benefits to our region. We're recognised as a dynamic, passionate, conscious and people-focused team that safely and reliably delivers gas to over 2.7 million homes and businesses across the North East, northern Cumbria and much of Yorkshire. Although we don't source the gas, fix boilers and appliances, or get involved with plumbing, we work with those that do to deliver it through a vast network of underground pipes that are constantly being invested in and upgraded. It's more complicated than it sounds so we're always exploring cutting-edge thinking, revolutionary engineering practices and world-class science to find new ways to provide sustainable sources of energy. And while our customers may not see us very often, they can sleep soundly knowing that we're working around the clock to keep them connected and make sure they stay safe. For more information [visit the Northern Gas Networks website](#). Alternatively, [like us on Facebook](#) or [follow us on Twitter](#).
2. You can contact Northern Gas Network's press office on: 0113 322 7950 during office hours (between 8.30am and 5pm, Monday to Friday, excluding bank holidays) or call the out of hours service on 0113 322 7978 at any other time. You can contact the Northern Gas Networks Customer Care Team on 0800 040 7766.
